since RY 2010	cm	Case Mix (CM)	n	8			The Case Mix is the sum of the effective cost relations of all hospital cases treated in the relevant reporting year. The calculation includes the effective cost relation of the DRG of the case treated. Day-related reductions (where duration of stay of a case is below the minimum duration), surcharges (where duration of stay of a case exceeds the maximum duration) as well as transfers of cases according to DRG regulations are included. Additional charges and full inpatient treatments, which are not remunerated by the DRG catalogue, are not included.
since RY 2010	cm_n	valid cases (counter variable for the Case Mix)	n	8			Counter variable, which takes the value 1, if cm and cm_vol show valid values.
since RY 2010	cm_vol	Case Mix-revenue in euros	n	8			The Case-Mix Revenue is calculated by multiplying the effective cost weight by the relevant Land-wide base rate (with "Angleichungsbetrag") of the hospital cases. Additional charges and full inpatient treatments, which are not remunerated by the DRG catalogue, are not included.
RY 2007 - 2009	BwriVol	DRG-revenue	n	8			For an approximate expansion of the total revenue exclusively in departments; calculated through the DRG cost weights in accordance with DRG catalogue multiplied by Land-wide base rate. Surcharges, reductions and additional charges are not included.
